**Claim Rejections - 35 USC § 112**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 1 and 3, applicant utilizes the term "comprising" multiple times. This term is placed where preamble of a claim ends and body of the claim begins where each and every physical limitation must be examined and given patentable weight. Therefore, it is not clear, for the limitations recited between two "comprising" is afforded in body of the claim. Dependent claims are indefinite for the same reasons since by their dependencies, it incorporate the same deficiency as their parent claim.

**Claim Rejections - 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Takakyu (JP 11-345688).

Takaku, in figures, discloses an organic EI display (see abstract) comprising organic EI device, color converting member (color converting layer), shielding layer, and aperture aperture region. See figures 2-3 and 5. Edges of the aperture region are

closer to the center of the aperture region than edges of the emission region (seen but not labeled in figures 2-3 and 5).
